

New

Push[®] Aequi Flex

Now with Flex-protect innovation
for supreme comfort

The Flex-protect innovation

Characteristics of the shell

- Flexible towards the edges
- Rigid core

Features of the strap system

- Soft, breathable strap
- Functional, stabilising tape

The ankle joint is secured effectively and comfortably, thanks to the combination of rigid and flexible elements.

Push Aequi Flex

for supreme comfort

IMPROVEMENT

Construction of the shell

Large-area straps

Integration of elasticated tapes into the shell

ADVANTAGE

Optimised fit for every shoe

Increased stability

Easy to put on

Scientifically proven stability

Compared to other common ankle orthoses, the Push Aequi Flex offers the highest stability.
