

High-Quality & Affordable Prosthetics & Orthotics

Joren Vallaey  
Co-Founder & COO/CFO

# Situation today

5-15%

Of the 40 million amputees in LMIC receive a prosthetic (WHO 2017)

35 Million

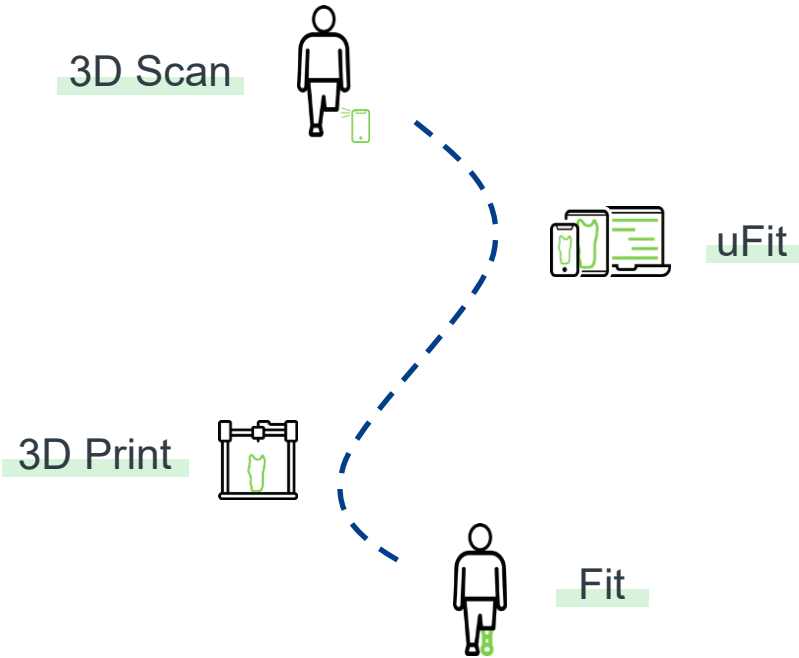

Amputees have no solution today

No prosthetic = no job, no education, difficult future

3 GOOD HEALTH AND WELL-BEING

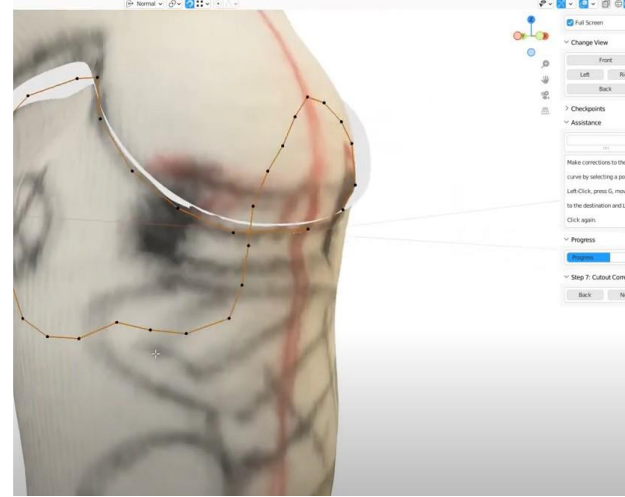

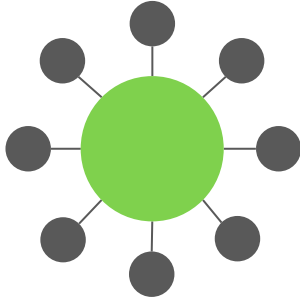

# Ugani's solution

Highest quality and lowest cost on the market.  
Scalable with the **DistributedFit** model, fast and decentralized (remote).

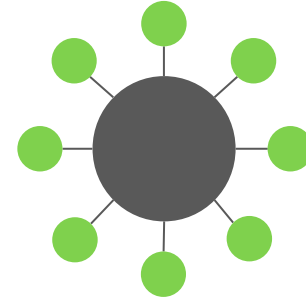

## PrintLab

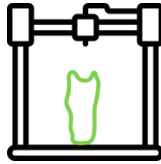

- Centralised Hub for production of 3D Devices
- Uses 100% Ugani Technology
- Run like startup, efficient & lean
- Local Prosthetic and Orthotic Centre
- High quality, and simplified operations
- Sell/Give 3D devices to patients & to MobilityMakers

## MobilityMakers

- Independent Prosthetists using 3D
- Ugani trains & supports
- Coverage => entire region
- 3D scanning and modelling
- Order socket / full prosthetic, shipped in 72h
- Remote and location-independent, home care
- PrintLab associated CPOs or independent partner CPOs (Freelance / hospital / gov / agency / NGO / ...)

# Why choose Ugani?

## Lower cost

Material costs for production of devices are lower, as the costs to equip a P&O center

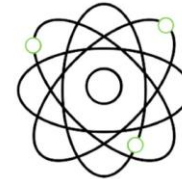

## European Quality

Tested prosthetics give optimal comfort for your patients

## DistributedFit

DistributedFit allows for excellent patient care, and easy scaling with partner P&Os

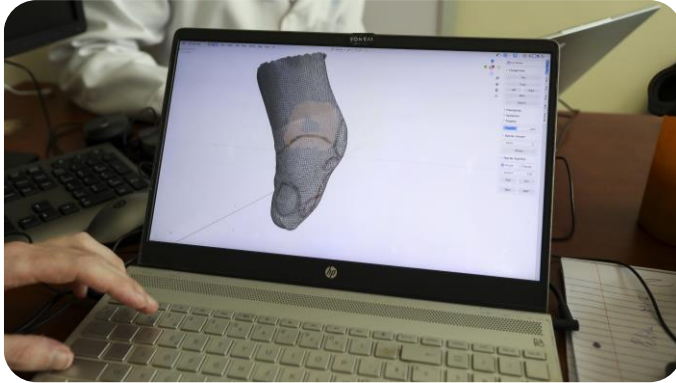

## All-in-One solution

Ugani's solution enables you to use 3D from A to Z with tools, workflows, training and support

Lower Price for patient, while delivering High-Quality devices, scalable

Open-source software  
First module launched in July 2023

- More than 150 registered CPOs
- From more than 40 countries worldwide
- Based on Blender, 3D modeling software
  
- Free: basic modeling tools for all devices, Ugani branded, ICRC and standard 4-hole connector.
- Premium: advanced modeling tools, custom branding, logo printed, pinlock and other connectors, customization to your needs
  
- Global reach for Ugani
- Potential to help thousands of patients worldwide

# Showcase: Prothea Kenya

Opening 1<sup>st</sup> of April 2023  
Workshop in Nairobi, Kenya  
Staff of 3 CPOs, 1 manager and 1 3D engineer

- Operationally break-even in 3 months
- One of the largest workshops in East Africa
- Reached more than 50 patients in first 3 months
- DistributedFit in whole East Africa to empower local workshops
- Cost of devices is 3-5 times lower than anything comparable in the country
- Basic TT prosthetic starts at about 350\$
- 2-3 days delivery instead of weeks
- At home or remote service
- Highest quality products

# Ugani

*Prosthetics*

Making high-quality and affordable  
Prosthetics & Orthotics accessible for all.
