

Decorative gemstones for your individually designed journey

New: Lastofa Forte with decorative gemstones

ofa®

lastofa® forte

Flat-knitted
medical compression
with merino wool

More individuality?

Of course. With Lastofa Forte decorative gemstones.

Effective oedema treatment requires a lot of self-motivation and discipline. This is why the treatment should be made as individual as possible. Flat-knitted medical compression stockings provide the foundation for this treatment. **Eye-catching colours, patterns and personalised embellishments on your compression stockings are a good way to express your personality.**

We now offer **decorative gemstones** for our **one-piece leg support fittings** for Lastofa Forte. The shimmering stones are attached from above the ankle (measurement B) to the middle of the thigh (measurement F) on Lastofa Forte for a supplementary charge.

Example:
Decorative gemstones
on the stocking colour lava

Positioning range and designs

The decorative gemstones can be applied to the following one-piece leg fittings from Lastofa Forte:

- AD
- AG
- AT
- AT/U
- BT

In these models, the decorative gemstones are attached starting with the section of **measurement B up to the measurement F**. No stones are affixed above the measurement F or below the measurement B. Shorter ranges, e.g., from C to F, are also not possible.

The decorative gemstones can be ordered in the comments field of our Lastofa Forte fax order pad. Simply enter „with decorative gemstones“.

The stones can be applied to the following colours and in combination with these decorative seams:

soil

bronze

soil

ocean

silver

Heart design

- The free embroidered heart can also be combined with the decorative gemstones.
- It is intended to encourage patients afresh each day to pursue the treatment consistently.
- The heart is worked into the foot part between the ball of the foot and the heel.

Combinations and add-ons

Any foot shape and any grip top can be combined with the decorative gemstones. These special designs are also possible together with the decorative gemstones:

- lateral elevation
- slip design
- upper leg elevation,
- anatomical knee,
- lining fabric/pocket for loose pads/lymph pads,
- open crotch, breathable gusset

In the following cases it is **not** possible to combine with the decorative gemstones:

- for two-piece supply
- for zip and velcro fasteners
- for fixators
- for sew in pads or lymph pads
- for sew in grip top pieces (only AD)
