

# Eurofins Cosmetics & Personal Care:

Since 2001, Eurofins network of companies has been active in cosmetics and personal care testing. Acquisitions of leading companies have strengthened the Eurofins business line, enabling it to

become the world's leading cosmetics & personal care testing provider. **Eurofins Cosmetics & Personal Care** network of laboratories relies on its qualified teams (around 850 employees) and on its network of laboratories (24 clinical and 12 analytical facilities) in all regions of the world. Our network of laboratories offers a full range of services to retailers and cosmetic manufacturers from raw materials suppliers to finished products producers. Each lab counts with highly qualified teams dedicated to develop and implement test protocols, quality assurance guaranteeing reliability, reproducibility and traceability of results and high-tech equipment. Therefore, we offer a full range of analyses serving the cosmetics and personal care industry:

- Cannabis (CBD)
