DIGITRAN[®]
DIGITAL PRINTING. TRANSFER. DECORATION.

Your One-stop-shop for Print and Packaging

Benefit from our combined service of primary packaging and high-quality digital printing, without UV and without VOCs. We have specialized in tubes and airless dispensers for this purpose.

- Cost-efficient even for small quantities
- Personalizable to serializable print designs
- Environmentally friendly without UV hardeners or solvents
- Finest, photorealistic 1,200 dpi print resolution

Tubes

The perfect packaging for creams and gels. Whether as a to-go size or large tube with 200ml.

Product Variants

Volume:	6 to 200ml
Closure:	Flip-top or screw cap
Diameter:	Diameter from 13,5 to 50mm
Material:	Mono (PE) and Coex
Color:	White / Transparent / Colored
Seal:	ALU seals / sleeves

Airless Dispensers

Due to the exclusion of air and precise dosing, airless packaging is ideal for high-quality creams and gels.

Product Variants

Volume:	15, 30, 50ml
Closure:	Pump dispenser with lid
Material:	PP (white-glossy)
Pump Volume:	0.3ml/stroke
Filling:	Top-Fill

Our Digital Printing

Our digital printing is based on the heat transfer process. For you, this means that we do not use UV-curing inks or solvents.

This reduces the risk of ink migration and also enables the finest details and gradients.

Further Products

In addition to tubes and airless dispensers from our stock, we can offer various other sizes and types of primary packaging.
