

VENUE LOCKERS

CAREFREE LOCKER SOLUTIONS
FOR EVENT VENUES

**MOBILE
LOCKER.EU**
YOUR HI-TECH LOCKER SOLUTION

MODULAR SYSTEMS

Mobile Locker has designed its lockers in such a way that we can easily match our client's demands or expand the amount of lockers. We offer standard locker units as well as tailor made solutions for your venue, for both indoor and outdoor use.

Our units require very low maintenance because of its ingenious design. Therefore our lockers are much less labour intensive than traditional locker systems, resulting in a low operational cost.

Another advantage is that all the hardware components are 'hot swappable'.

SMART, FLEXIBLE & SAFE

Our **smart** lockers give you transparent data so that you always have an overview of the number of rented lockers and the corresponding income in real-time. There is also the possibility to accept locker reservations and vouchers.

The software enables us to be **flexible** towards any 'ecosystem' such as music venues. We can easily adapt the user interface and we are open to 3rd party integrations.

Safety in storage and lockers is key to us. Therefore, Mobile Locker has designed and produced locker solutions that match all existing safety standards and needs.

REVENUE MODEL

At Mobile Locker we offer you Lockers As A Service, or 'LAAS'. In this way, you don't bear any investment in the hardware but receive a share on the locker turnover.

Thanks to our online reporting tool we are 100% transparent. In addition to that, we can offer a sale and lease back option. We help to make your location as profitable as possible by drawing up a sales and marketing plan.

- Cloud based import of data
- Proof of Delivery (POD)

OUR CUSTOMERS

Peter Dobbels | Sportpaleis, Antwerp

'Thanks to the autonomous locker solutions of Mobile Locker our entry and exit flow before, during and after a show is much faster and more efficient. With Mobile Locker we reduced our overhead costs drastically, which resulted in an increase of our return on investment. Furthermore, we now have a fully transparent trackable system.'

PRODUCT SPECIFICATIONS

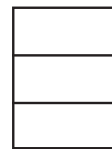

- User friendly electronic and fully autonomous lockers
- High-end reinforced steel materials
- Customisation of the hardware
- Different payment options: card payments, NFC, Contactless, Apple pay, QR, voucher, online reservation, ...
- Online monitoring systems

CUSTOMISABLE

Our lockers are tailor made according to the needs of your venue or business model, and can be fully branded in the colours/logos of your venue or partners, for extra visibility.

Through customisation we optimise your available space so less space is needed for the same amount of storage, compared to traditional solutions. Per square meter we can easily stow away 150 coats & backpacks. We offer several different locker sizes from which you can choose, to meet the demands of your customers.
