# What is nukomr®?

nukomr® is a fully automated transcription and interpreting tool designed to facilitate communication and promote inclusion.

It is built with unique algorithms and based on AI. Speak in one language and the people you are talking to can hear or read what you say in the same language or a different one.

## Who is nukomr® for?

Museums (science, art, etc.), cultural and sports venues, events agencies, public bodies, companies... The flexibility, scalability and adaptability of nukomr® make it ideally suited to all sectors.

nukomr® is designed to be accessible to everyone, regardless of the language they speak, their age, technological equipment or hearing or visual disability.

## Use and requirements

nukomr® requires no more than an internet connection (4G, 5G or Wi-Fi) and can be used via our app, a link or a QR code.

Fully compatible

It is simple and easy to use for everyone, with no need for downloads or technical equipment - a smartphone and a pair of ear buds will suffice!

nukomr® is also customisable, allowing you to specify key information such as names, technical terms and context.

## Endless applications

- Accessible guided tours for all audiences
- Remote and in-person training and conferences
- Live commentary at events with a wide range of participants
- Colloquia
- Interactive information panels
- Robot tour guides
- And many more!

## Committed to inclusion

As an inclusive, accessible tool, nukomr®'s primary aim is to promote inclusion by enabling people to communicate regardless of the language they speak or whether they have a hearing or visual impairment.

In addition, part of the profit generated by nukomr is donated to a charity of your choice dedicated to inclusion.
